SRISHTI MALIK

Aspiring Associate Product Manager | AI Products, Product Analytics & Discovery

Delhi | +91-9205639958 | malik.srishti167@gmail.com | LinkedIn | Portfolio Link

PROFESSIONAL SUMMARY

AI-focused product management candidate with 2+ years of experience in AI/LLM operations, data quality and root-cause analysis. Skilled in product discovery, PRD development, prioritization, product analytics and cross-functional execution. Built a RAG-based AI product prototype, translating user pain points into product requirements, success metrics, experimentation plans and responsible AI guardrails.

CORE SKILLS

- Product Management: Product Discovery, PRD, User Stories, Acceptance Criteria, Impact-Effort Prioritization, Agile Backlog Management, MVP Scoping
- User Research & Analytics: Voice of Customer (VoC), User Journey Analysis, Root-Cause Analysis, KPI Definition, North Star Metrics, A/B Testing, Experiment Design
- AI Product Development: Generative AI, RAG, Prompt Engineering, LLM Evaluation, AI Prototyping, Responsible AI, Human-in-the-Loop Workflows
- Tools & Technical Skills: SQL/MySQL, Advanced Excel, Groq API, Make.com, Airtable, v0 by Vercel, Jira, Figma, Miro, Python
- Execution & Collaboration: Cross-Functional Collaboration, Stakeholder Management, Process Improvement, Product Documentation, Quality Analysis

Craving Buddy — AI-Powered Food Discovery | Swiggy Case Study | Prototype Link

- Analyzed Swiggy's Search & Discovery flow using 10 screenshots and 12+ public-source VoC quotes; evaluated five friction points using an Impact–Effort framework and prioritized natural-language search failure for an AI-led solution.
- Authored a RAG-based PRD with 5 INVEST user stories, Given - When - Then acceptance criteria, 12 functional and 9 non-functional requirements, and a story-pointed agile backlog; built a partially working prototype using Groq API, Make.com, Airtable, and v0.
- Designed end-to-end measurement framework for Craving Buddy — defined North Star Metric (7-day repeat usage rate), 6 supporting KPIs, and a structured A/B test with hypothesis, guardrail metrics, and kill-switch criteria; prototype testing demonstrated the full happy-path flow with mock data, validating the discovery-to-order journey before live rollout.

PROFESSIONAL EXPERIENCE - Innodata India Pvt. Ltd.

Quality and Policy Expert: Nov 2025 – Present

- Identified recurring error patterns through systematic root-cause analysis and redesigned calibration workflows, improving project quality scores from 30–40% to 70–80% — directly reducing rework cycles and increasing throughput capacity for the team by an estimated 30%.
- Owned quality assurance across a team scaling from 20 to 50+ specialists; introduced structured coaching and standardised review rubrics that reduced inter-reviewer inconsistency by ~40% and improved team-wide audit pass rates within 6 weeks.
- Stepped into acting Team Lead role, coordinating daily operations, resolving blockers, and maintaining delivery timelines with zero SLA breaches during the transition period; recognised by senior leadership for operational continuity.

Analyst, AI/LLM Practice: Jun 2024 – Oct 2025

- Identified data imbalance and labelling inconsistencies impacting model training reliability; prioritised dataset restructuring initiatives that improved classification accuracy on downstream model evaluations, unblocking a key model release milestone.
- Proactively identified LLM failure modes and coverage gaps affecting output quality; developed adversarial and edge-case test sets that exposed 3 critical model weaknesses — recommended guardrails were adopted by the ML team and reduced production error recurrence in subsequent evaluation cycles.
- Translated error analysis into dataset, guideline, and taxonomy recommendations adopted by downstream ML teams; documented workflows to improve consistency and reuse.

EDUCATION

B.A. (Hons.) Economics | Lakshmibai College, University of Delhi | 2021–2024 | CGPA: 7.135

Senior Secondary (CBSE) | Prabhu Dayal Public School | 2021 | Score: 96.25%

ADDITIONAL PROJECTS, LEADERSHIP AND CERTIFICATIONS

- **Future-Ready Product Management with Applied AI** by iHUB Divyasampark, IIT Roorkee
- Independent Economic Research on India's trade and Gujarat's economic development.
- Content Head, E-PARCUS (Economics Society), Lakshmibai College
- Class Representative: Served as class representative across multiple academic terms.

ADDITIONAL INFORMATION

Languages: English, Hindi, French
