PROFESSIONAL SUMMARY

Data quality and operations analyst with 2+ years in AI/LLM data operations, managing high-volume data, trackers and recurring quality reporting across a 20-50+ specialist team. Skilled in data validation, trend and root-cause analysis, and turning findings into actionable stakeholder updates. Advanced Excel and MySQL; hands-on generative AI, with exposure to Power BI and Microsoft Copilot.

CORE SKILLS

- Product Strategy & Discovery · Root-Cause Analysis · Product Analytics & Experimentation · AI Product Building & Prototyping
- Excel (Advanced) · MySQL · Figma · Miro · Jira · MS Office · Python
- Generative AI & Prompt Engineering · Human-in-the-Loop Review · Process Improvement
- Stakeholder Management · Cross-team Coordination · Communication & Collaboration · Linguistics (English, Hindi, French)

PROFESSIONAL EXPERIENCE

Quality and Policy Expert *Nov 2025 - Present*

Innodata India Pvt. Ltd.

- Audited output from 20+ specialists, scaling to 50+, validating work against evolving policies to ensure data accuracy and integrity.
- Scored 100% on senior quality audits of own review work, reflecting strong attention to detail.
- Monitored quality metrics and error trends across audit cycles; project quality rose from 30-40% to 70-80% through structured calibration workflows built on root-cause analysis.
- Ran live shadowing and real-time coaching for junior specialists, improving adherence to QA standards team-wide.
- Acted as Team Lead during a manager's absence, independently managing daily operations, deliverables, and follow-through to closure.

Analyst – AI/LLM Practice *Jun 2024 - Oct 2025*

Innodata India Pvt. Ltd.

- Structured unstructured data into balanced, classification-ready datasets, improving model accuracy and evaluation reliability.
- Designed adversarial, synonym, and edge-case examples to close coverage gaps and reduce LLM failure modes.
- Diagnosed model errors and translated findings into dataset, guideline, and taxonomy recommendations adopted by downstream ML teams.
- Maintained keyword lists and extraction workflows that improved data fidelity at scale, documenting processes for team reuse.

PRODUCT MANAGEMENT PROJECT

Craving Buddy - AI Product Audit & Feature Spec (Swiggy)

- Conducted an end-to-end AI product audit of Swiggy's Search & Discovery flow, identifying decision paralysis as the highest-impact friction.
- Designed "Craving Buddy," a RAG-based conversational food discovery feature; built a working no-code prototype with prompt design and workflow automation using Groq API, Make.com and Airtable.
- Delivered a cross-functional product defence covering responsible AI guardrails, A/B test design and phased GTM rollout.

EDUCATION

BA (Hons) in Economics, Lakshmibai College, University of Delhi *2021 – 2024*

CGPA: 7.135

Senior Secondary (CBSE), Prabhu Dayal Public School

96.25%

PROJECTS & LEADERSHIP

- Independent research: *Impact of Imports and Exports on India's GDP*; *Gujarat's Economic Renaissance* — quantitative economic analysis using real-world data.
- Content Head, E-PARCUS (Economics Society), Lakshmibai College; Class Representative (multiple terms).
